Introduction

The lamp at the top of the tower turned slowly through the night. Mara counted the seconds between each sweep of light across the water. Far below, the waves folded over the rocks with a patient, steady sound. Mara counted the seconds between each sweep of light across the water. Far below, the waves folded over the rocks with a patient, steady sound. She wrote the weather in the logbook, as her grandmother had done before her. Far below, the waves folded over the rocks with a patient, steady sound. She wrote the weather in the logbook, as her grandmother had done before her. A ship passed to the north, its lights small and bright against the dark. She wrote the weather in the logbook, as her grandmother had done before her. A ship passed to the north, its lights small and bright against the dark. In the morning the fog came in, and the whole island seemed to hold its breath. A ship passed to the north, its lights small and bright against the dark. In the morning the fog came in, and the whole island seemed to hold its breath. There were letters to answer, and a stove to keep warm, and gulls to watch.

Part One

Mara counted the seconds between each sweep of light across the water. Far below, the waves folded over the rocks with a patient, steady sound. She wrote the weather in the logbook, as her grandmother had done before her. Far below, the waves folded over the rocks with a patient, steady sound.
